In India

What are we enabling?

Skill Building

Entrepreneurship

Wholesome Living

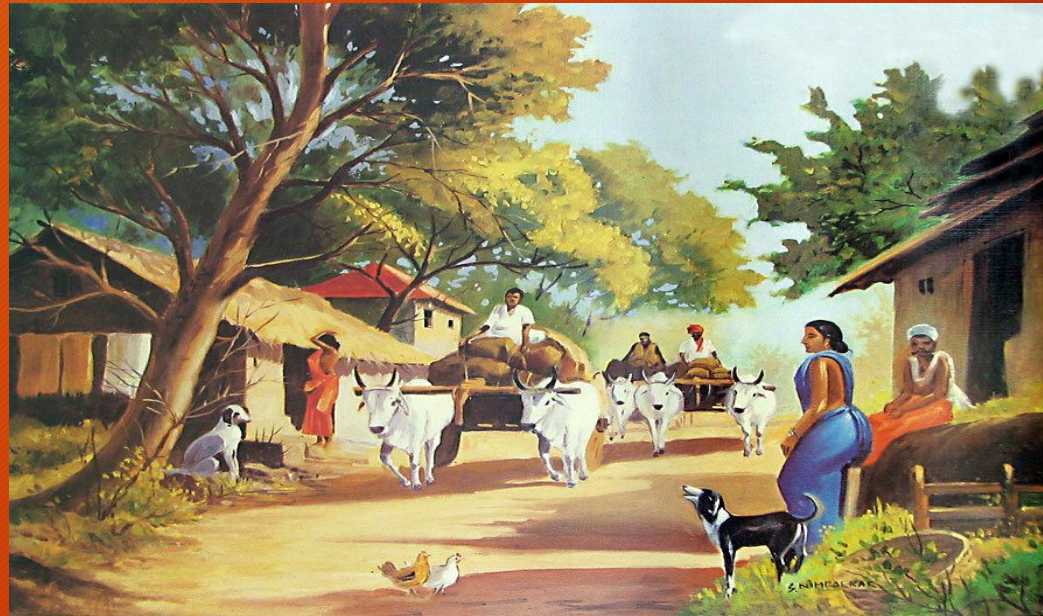

What are we enabling?

Localized
Development

Retaining the cultural and economic
echo system of village

Not only retaining but also potential to taking nationally and internationally

Support system for Urban Industries(SME's)

Less Migration

“

Skill
Localized Job
Become Entrepreneurs
Exposure to Technology local & international

”

Students Role - Development and Learn

What are You Selling?

“

Employability
Localized Development
Community Participation - PPP
Taking care of livelihood and career
Self Sufficiency of village at low outgo

”

Government Role - Coordination and Funding

What are You Selling?

“

Better manpower resources
Identified Business Opportunities
Support of public and institutions
Availability of prototype at minimal cost
Possibility of local & national level business

”

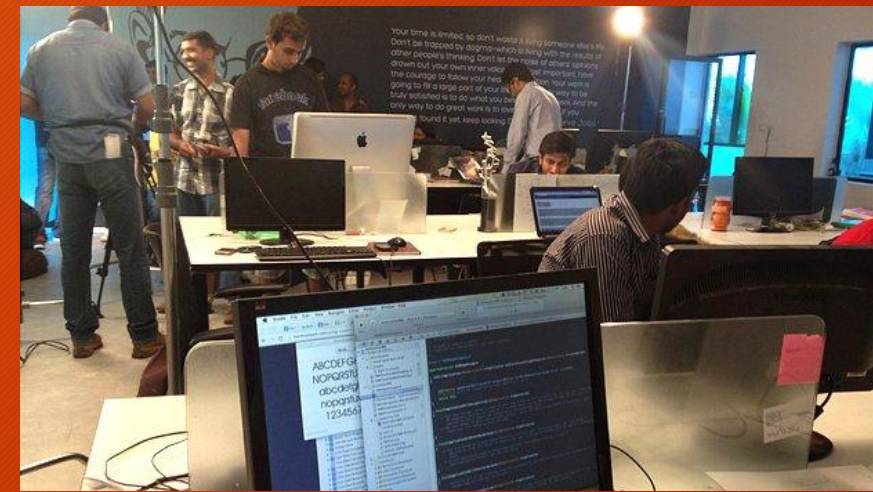

Entrepreneurs Role - Provide Tools and Space

What are You Selling?

“

More objective projects.
Employability of students.
Higher possibility for interaction with students and
Government.
Dependence of community apparent on education
institution.

Engineering Colleges Role - Provide final year students

”

What are You Selling?

Funding

Government

Research

Government will fund for supporting and carrying of ongoing research. Scope for higher research using faculty and students.

More Scope

Education

Scope for more objective and specialized courses

Deep penetration of education into society

What is in for me?

- We are going to encompass, compile and lead the entire program
- We will get money from students, colleges for enrolling in this program
- We also get funding from government as part of PPP
- But our intention is to look at the larger picture of reseller market provide liaison & after sales service for buying selling, land etc
- We will also get commission for these services

ILLUSTRATION: CHAITANYA CHAUDHAN / CSE

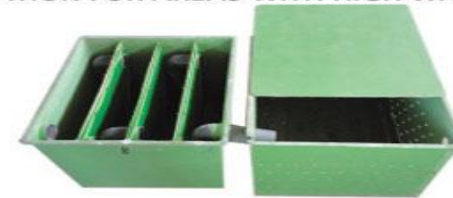

The toilet has a tank fitted below the commode. The tank has sheets with bacteria embedded. When waste comes in contact with bacteria it gets converted to water and methane

MODIFICATION FOR RAILWAYS

A special lid allows for non-biodegradables like plastic bottles to be flushed out. The excreta enters through a separate opening into the digester tank

MODIFICATION FOR AREAS WITH HIGH WATER TABLE

The tank has several chambers. This increases the retention time of the waste and provides more surface area to break down the waste

Bio Toilet

In-turn Used as Manure
